

Communication Solutions

ESTOS ECSTA für snom and ESTOS ProCall One. Unbeatable as a Team.

snom
VoIP phones

ESTOS CTI Solution for snom snom phones and ESTOS software are the trend setters

Professional TAPI Driver for snom phones

The ESTOS ECSTA for snom (single seat) is the professional middleware for SIP phones from snom and converts the CTI interface protocol into the Microsoft TAPI standard. The product is the ideal TAPI driver for small offices and homeworking scenarios and represents the perfect add-on for ESTOS office productivity solution ESTOS ProCall One. Equipped with features like Computer Telephony Integration (CTI), contact data search, and -management, „Active Contacts-“ Technology, journal and call planning ESTOS ProCall One has been designed for the Windows PC. It is aimed at professionals like self-employed, freelancers and sales managers to handle their communication via E-mail or telephone. The software allows an optimized collaboration with business partners and customers, because it simplifies the work processes in general.

ESTOS ProCall One

ESTOS ProCall One is a single-seat CTI-solution with all basic and comfort telephony functionalities like make call, answer call, retrieve call, consultation call, transfer and set forward call. For all incoming calls the available contact data is matched with the phone number and the appropriate contact details are shown up. The user is informed immediately who is calling with all needed contact data. If no contact matches the phone number can be formatted comfortable and used for the leading application (e.g. Outlook). Tediously editing or copying of data is not required anymore. A journal provides a perfect overview of all calls. ESTOS ProCall One has been designed for the integration with Microsoft Outlook, Lotus Notes & Tobit David Infocenter. Furthermore for the so called inverse search contact data can be processed via ODBC and LDAP.

By purchasing ESTOS ProCall One the middleware ESTOS ECSTA for snom is delivered at no extra costs.
