

With **ixi-UMS Enterprise** you're managing all messages in only one surface. Telefax, voice mails and text messages are all shown in the familiar client (like Microsoft Outlook or IBM Notes).

Your company benefits from a reduced resource effort, as only one system has to be managed. The intuitive handling simplifies the daily working routine of the employees. Administrators appreciate the small effort in installation and service.

ixi-UMS Enterprise

Unified Messaging Server: All messages in one surface

Communicate safe. Act flexibly.

Future-proof solution. Easy to integrate.

ixi-UMS Enterprise can be easily integrated in many IT-infra-structures. Mixed integrations are also possible.

Integrates with:

- Microsoft Exchange Server
- IBM Domino
- SAP Systems
- SMTP-based Messaging Systems

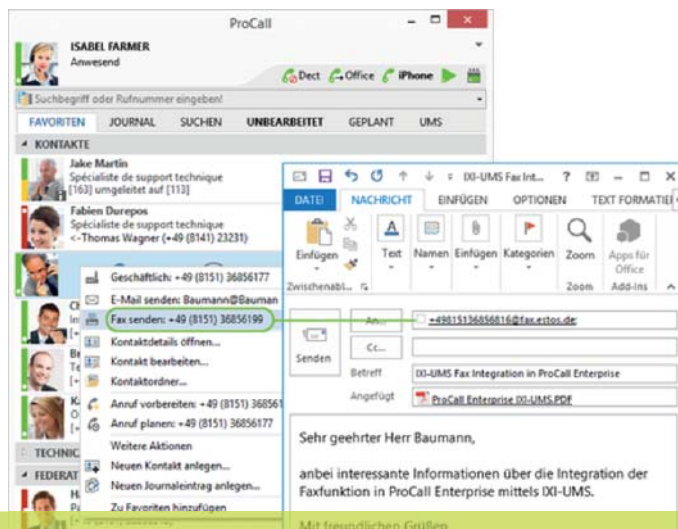

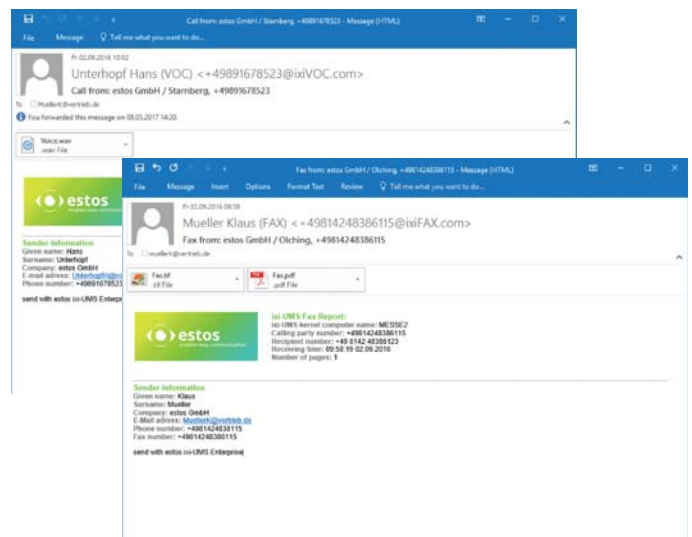

Advantages of the Add-On solution ixi-UMS

On the contrary to closed systems one can use the existing structure and architecture of the Messaging / Groupware system including the Groupware client to send and to receive messages.

High flexibility. Standard-based.

The solution's high scalability and modularity offers a flexible deployment for all company sizes:

- Usage as pure fax server or entire Unified Messaging solution
- Easy connection to ISDN and IP-telecommunication infrastructure
- Suited for physical and virtual machines
- Flexible configuration for projects with spread locations

Integration in ProCall Enterprise

The ixi-UMS Unified Messaging Server integrates with ProCall Enterprise. Users can send faxes straight out of their client or monitor. The processing is executed by the Unified Messaging Server ixi-UMS.
