

The **ECSTA series**, as middleware, facilitates communication between your telephone system and the world of Microsoft Windows. The implementation of the CSTA system protocol in the Microsoft TAPI standard produces considerable added value for improved communication.

ECSTA Series

Professional CTI and TAPI Middleware

Connect Worlds. Harness Synergies.

The better alternative to telephone system manufacturers middleware:

- 32 and 64-bit versions available
- Compatible with MS TAPI 2.1 or later
- Supports ECMA standard CSTA phase I, II or III
- Drivers can be instanced multiple times
- Multi-site / multi-vendor compatible
- Basic and comfort telephony features

Telecommunications systems supported:

Unify
