

ProCall 7 Enterprise

Unified Communications & CTI Software Suite

A company's communications, both internal and external, are becoming increasingly diverse. **As a unified communications & CTI software suite, ProCall 7 Enterprise** therefore offers its users maximum flexibility for their daily work. Whether from the workplace or on the move, whether via PC, laptop, tablet or smartphone – **ProCall Enterprise combines all important communication channels in a single application.**

Communicate anywhere

Employees in the company or in the home office    Employees on the move

 Prospective clients, partners or customers via the website

Employees in the company or working from home and employees on the move communicate with each other within the company or externally with business partners and customers via the native clients of Windows, macOS, iOS and Android. **Prospective customers, clients, or partners** can contact a company employee directly via the internet using the contact portal and multimedia business card.

The integration of Microsoft Teams in ProCall 7 Enterprise enables mutual synchronization of **presence and call states**.

Presence synchronization with Microsoft Teams

ProCall Enterprise

Microsoft Teams

There are basically **four different presence states** available in both ProCall Enterprise and Microsoft Teams: Busy, Absent, Present and Not logged in (Unknown). These are the names in ProCall Enterprise.

Show presence

With ProCall Enterprise

Present

Busy

Do not disturb

Inactive

Absent

Not logged in (Unknown)

With Microsoft Teams

Available

Busy

Do not disturb

Be right back

Display as absent

Display as offline

These four presence states are further categorized and provided with detailed information in both ProCall Enterprise and Microsoft Teams.

Optional:
Integration
ProCall Meetings

ProCall 7 Enterprise obtains information about a person's presence from various sources: Is the user currently in a phone call or a video call? Is there an appointment pending in the integrated calendar? Is the user in a real-time communication in Microsoft Teams or is he in a video conference via ProCall Meetings?

Synchronize presence

Appointment (busy)	Busy	
Appointment (absent)	Absent	
Presence change through appointment in Microsoft Teams - calendar integration		
No calendar integration possible in Microsoft Teams other than Microsoft 365		

Here is an overview of how presences are displayed in each application.

ProCall Enterprise – "My presence" area

The "My presence" area shows, for example, whether the user is currently conducting a telephone call via Microsoft Teams or is in a ProCall Meetings video conference. In addition to the two-way presence matching, the "Do not disturb", "Busy on Busy" or "Call protection" functions ensure uninterrupted communication. **And with just one click on the "T" icon, the user can switch to the Microsoft Teams client.**

ProCall Enterprise – Contact card

The image shows a screenshot of the ProCall Enterprise interface. On the left, a contact list is visible with entries for Lena Frisch, Nadine Neumann, Dirk Bohm, Stefan Frei, Christine Lang, John Eckert, and Ron Lambert. A contact card for Nadine Neumann is highlighted, showing her profile picture, name, and status 'Homeoffice We + Th'. Below the name are icons for phone, video, chat, calendar, and email. A callout box points to the chat icon, containing the text: 'Send a message via Microsoft Teams' and 'Send a message to Nadine Neumann using Microsoft Teams'.

The contact card: Is a colleague on the phone, chatting via video or in an online meeting? Regardless of whether they are communicating via Microsoft Teams or ProCall Enterprise, the user can see whether their colleague can be easily contacted! **And with just one click on the "T" icon, a Microsoft Teams chat can be started.**

The tooltip: All information at a glance
